JL portable oil filter machine

Usage:

The Mini Portable Oil Purifier, Oil Filter is equipped with three-stage filter; it is portable, easy to operate, with very low price, no need of purification paper, and no contamination to the ground. The machine can effectively purify tiny and fine mechanical impurities; meanwhile it is oil filling machine. So it is a prior choice of power industry, petroleum, chemical, metallurgy, mechanics and railway for oil purifying and oil filling.

Features:

Can filter all the solid impurities, suitable for many different types of oil.

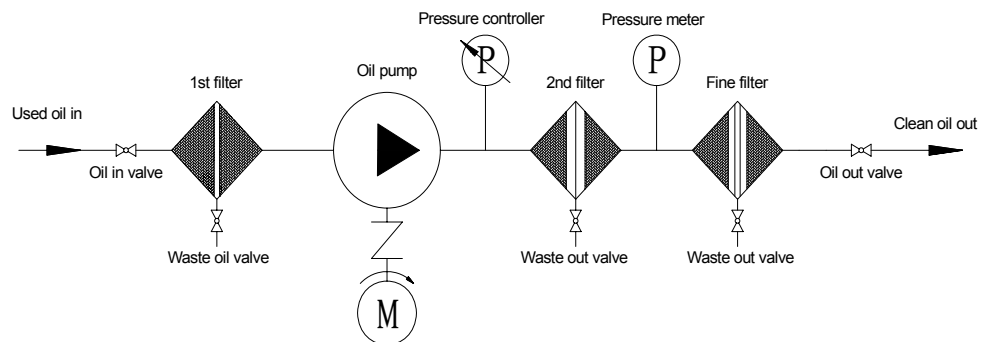

Mini Portable Oil Purifier, Oil Filter has three class filtration process.

The Mini Portable Oil Purifier, Oil Filter is portable, easy to operate, without filtration paper and will not pollute the places.

The Mini Portable Oil Purifier, Oil Filter has widely usage than common's pressure oil purifier and longer to use.

It is a upgrade products based on plane pressure filter.

- 1, It can working online.
- 2, Environment friendly.
- 3, Power cost less.
- 4, Strong and stable.
- 5, With the engineer installation.
- 6, We can take the special order as the customer need.

INDEX	UNIT	JL-30	JL-50	JL-80	JL-100	JL-150	JL-200	JL-250	JL-300	
Flow rate	(L/H)	1800	3000	4800	6000	9000	12000	15000	18000	
Pump head	(m)	6	8	8	10	12	15	15	15
